Washington, DC 20590

From: Frances P. Purvis
7436 Ardglass Dr.
Lorton, Va. 22079

I have read many articles and listened to many voices on people having many problems feeling uncomfortable in any vehicle without the proper needs. I strongly feel that the NHTSA could make a lot of people happy if they put themselves in their shoes. Why is this such a difficult task for you to fix!.

I know many people that are in this situation and are afraid to travel due to the fact that if by any chance an accident occur, they will be the first to get hurt because they can not fit the standard size seat belt that was only made for people 220 lbs and below. This is not the American Way.

They just want to feel safe and comfortable when traveling. I urge you, (NHTSA) to do everything possible in your power to accommodate this need. I strongly believe you will act accordingly, and do the right thing. This is a cry from everyone that fits this criteria.

This letter is in reference to Elizabeth Fisher's Petition for and amendment to SEC. 571.209 Standard No. 209, Seat Belt Assemblies.

Thank you
Frances Purvis
